

This is the resulting graph of the car's speed in MPH vs. time

Background

- Took Introduction to Computer Science in senior year of high school
- Have been interested in F1 and racing for as long as I can remember

Welcome to Newt's Data Presentation

Takeaways/Things I've learned from this project

- How to use Git & GitHub (Had a lot of fun learning it :D)
- Learned Python & the associating libraries (built on prior Java basics)
- Working efficiently under time constraints and tight deadlines
- How to read a parquet file in Python
- How to manipulate parquet files in Python
- Improved technical communication skills
- What a Parquet file is

Things I will bring to the team if I am selected

- Curiosity
- Passion-driven work ethic
- Eagerness to learn and collaborate with others
- Willingness to put in the hours to bring this team success
- High-energy collaboration and fresh perspectives
